Projects

Grocery shop   *Android Application, Application development, Firebase*

Grocery App | Android Application

- This application serving three distinct users: Admin, Vendor, and Customer.
- Admin work is to connect vendor's shop with Customer.
- Customers have the advantage to buy products online from Vendor's directly.
- In the application customers can see the daily coupons, offers on selected products.

OSMS(Online Service Management System)   *PHP, HTML, CSS, PhpMyAdmin*

Services of Electronic Items.

- The website specializes in selling and repairing electronic products online, catering to customer needs.
- Customers access the services through the OSMS portal. To initiate a repair or purchase a new electronic item, customers need to register on the portal.
- When customers buy from our web portal, they enjoy easy access for reporting and resolving product issues. They can quickly request assistance, and we promptly assign skilled technicians for necessary repairs.
